Minute Man Dart League, Inc. P.O. Box 2165 – Danvers, MA 01923

Dear MMDL Members:

As you may be aware, there have been many rumors regarding a potential merger between the Minute Man Dart League (MMDL) and the Commonwealth Dart League (CDL), partly fueled by this past summer's changes to the MMDL Board of Directors. This letter is to inform you that this merger is in fact taking place and a unified Boston Area will begin in the Spring 2009 season.

Attached is a copy of the letter being sent to all CDL members, which explains the reasons and motivations behind this important step for both organizations. As this past fall season commenced, the leadership of both leagues reached out to one another to address issues in our sport and found much common ground and shared goals. Over time, it became apparent that a merger of the two leagues made the best sense for all concerned and especially for the teams of the greater Boston area, which should now enjoy better competition and more favorable scheduling as an immediate result.

Three CDL Directors will be joining the MMDL board; they are: Dave Hohler, Dave Brincheiro and John Kerins. We welcome these three to our organization and are excited to bring their unique skills, knowledge and passion to our league. The full scope of changes and implications for members will be announced over the next several months as we transition into the Spring 2009 season and beyond.

We are confident that with these recent developments, there will be many positive changes in store for the future and we are committed to providing the most progressive, player-oriented, user-friendly and modern league that the teams and sponsors of our region deserve. We hope that all of our members support these initiatives and are, of course, open to hearing from any member who has an opinion to share or assistance to offer.

If you have any questions or concerns about this, please feel free to contact anyone on the board, and we also encourage you to participate in discussions on the MMDL forums located here:
